

**TRUST FIRST | SOLUTIONS DRIVEN | MISSION OBSESSED**

## **CYBER STRATEGY & OPERATIONS**

The evolving cyber threats to our Nation require vigilance, continuous monitoring and hardening of the security posture. That's why we carefully follow a comprehensive approach to stay ahead of the adversary and enhance the security of your organization.

We understand what's at stake and we take that responsibility seriously.

## **IT SUPPORT SERVICES**

Every mission is unique and we approach each challenge with an open mind. We bring the right technology solutions and deliver services that are proven to achieve your mission.

We lead with the RedSky value of Trust First to ensure that we work collaboratively with all the parties involved. We'll also work with a shared emphasis on User Experience and Security – not sacrificing one for the other.

## **PROGRAM & PROJECT MANAGEMENT**

Our Program and Project Management services are designed to help organizations successfully execute complex programs and projects while minimizing risk and maximizing value.

We work closely with our clients to understand their objectives and risks and create tailored plans that include detailed scope, timeline, and budget.

Throughout the project lifecycle, RedSky provides regular status updates, risk management, and issue resolution to ensure projects are completed with the highest quality standards.

## **POLICY & GOVERNANCE**

It's vital to align your IT strategy with your mission objectives and priorities. By providing unbiased guidance, we ensure our clients maximize their return on investment.

We help our customers steward their strategic goals by monitoring the environment, communicating risks and offering recommendations on how to best respond.

## **AV/VTC SOLUTIONS**

Does your mission require a cutting-edge collaboration or fusion center?

We'll work with you to design and install state-of-the-art solutions that deliver enhanced customer interaction through multiple high-definition systems.

Our systems combine video teleconferencing, audio, visual, and presentation capabilities in line with the latest technologies.

## **IT TRAINING & CERTIFICATIONS**

Our comprehensive course catalog features IT training and certifications taught by industry experts.

Our courses are designed to offer you the most practical and extensive training experience possible, accessible to you on demand – anytime and anywhere. We offer both online and on-site training with custom courses focused on mission specific outcomes. Our catalog of courses includes:

- Offensive Security
- CompTIA
- CyberAB - CMMC
- DevOps & DevSecOps
- Project Management Institute (PMI)

## RELEVANT EXPERIENCE

### Technical Consultation Support, USSOCOM

We develop strategic and tactical plans to identify, manage, and direct resources to support mission strategies and priorities. Our team supports Government leadership with best practices to harden the cybersecurity posture of the SOF Information Enterprise (SIE).

### Decision Support Center (DSC) LED Wall and DVLED Renovation, USSOCOM

Removal and disposal of the DSC's video wall, linoleum floor, and projectors. Installation of an 11' x 35' video wall and 20' x 32' fully walkable LED floor to support various SOF mission planning activities.

### C4IAS IT and Engineering, USSOCOM

Subject Matter Expertise support for Installation Processing Nodes (IPNs), Cyber Tools, Enterprise Software Agreements, MILCONs, Local Area Networks (LANs), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS).

### eBusiness Support, USSOCOM

Systems Administration, Technical, and Functional support and resources, to ensure the success of SOCOM/TSOCs procurement systems and applications.

### Client Support Technicians, Robins AFB 116th ACW

Tier 1 and Tier 2 support functions including installation, troubleshooting, and on-site and remote support of LANs hardware, software, and applications.
